

French Filigree Stiletto:

www.youngnails.com.au

By Simone Keyte:

Young Nails Australia Senior Mentor

STEP 1: Push back cuticles with Magic Wand. Remove excess keratin from nail plate, using the Young Nails' diamond cone bit, this will ensure excellent adhesion. Lightly etch entire nail plate with 150/150 grit file. Apply two coats of Protein Bond.

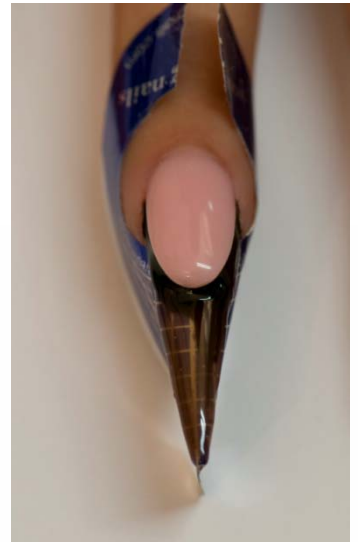

STEP 2: Place form in correct position. Apply a thin coat of Synergy Base Gel over entire nail plate floating the Base all the way to the tip of the form. Cure for 2 minutes minimum with your Young Nails Synergy UV Lamp. (or equivalent 36w Lamp).

STEP 3: Apply Reverse Bead of Frosted Pink Sculptor Gel using a floating motion. Float the weight of the bead towards the smile line, swoop brush around the front of the bead to create a wall. Cure for 2 minutes. Remove sticky residue with Swipe. File the smile line perfect with your Diamond File.

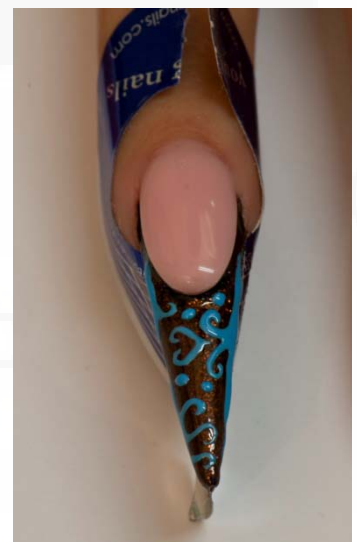

STEP 4: Using Kaleidoscope Black Gel Paint gently push colour up against the smile line, ensuring you have colour right up into side walls. Using Kaleidoscope Brown Gel Paint join to black and float out to tip of form. Cure for 2 minutes. (Do not remove sticky residue)

STEP 5: Apply Illume 2 Bronze Glitter to sticky residue with your brush. Push glitter into Coloured Gel residue until smooth. Apply a thin coat of Finish Gel over the glitter only and cure for 2 minutes (this creates a non sticky surface).

STEP 6: Apply light blue Gel (Mix equal parts of White Kaleidoscope Gel & Blue Kaleidoscope Gel) using the tip of a toothpick. Pull the toothpick through the gel to create a Filigree Design.

Freeze the Gel for 10 seconds after each small Portion of design has been applied, (This prevents running). Cure for 2 minutes.

STEP 7: Using the sticky residue left on the blue gel, gently & carefully push Illume 2 Stratosphere Glitter onto the filigree.

Clean up any excess glitter not on the Filigree using Swipe on the tip of your Imagination Art brush.

STEP 8: Cap entire Design with Synergy Build Gel, floating up against reverse wall & down to tip of form.

Flip the finger over for 3 seconds to level Gel to the smile line. Cure for 2 minutes. Remove sticky residue with swipe.

Electric File into shape using I-Formation technique. Complete with 150 Zebra hand file & Swipe. Apply Finish Gel and Cure for 2 minutes. Apply Rose oil.

Products Used:

Swipe - Item # 50001 / 50002

Protein Bond - Item # 50030

Base Gel – Item # 17003

Frosted Pink Sculptor – Item # 17055

Here at Young Nails we love our Gel!
Why?

If it's an overlay or extension, stiletto or Square, french or art design we have a Gel System for the job! There is a place in every salon for both Soft and Hard Gel Systems that's why we offer both, plus the Kaleidoscope gel paint system which compliments both and can be used when doing Young Nails Acrylic designs!

Our Synergy Hard Gel System offers Superior Strength & Flexibility that will enable you to create the ultimate extension. Our Reverse Application Techniques will provide foolproof perfect smile lines.

Our Mani-Q soft Gel System offers Natural Overlay's, Amazing Glitter Toes & Spa Manicure Design Nails. This application is so easy you could almost do it with your eye's shut!

Young Nails Gel is simple to use & a pleasure to teach, that's why we offer classes in all our techniques. Education, Customer service & Technical Support are our passion. We specialise in time saving techniques and great designs guaranteed to please. For more information & to see more Young Nails step by steps go to www.youngnails.com.au or contact Simone on 1300 766 121 or edu@youngnails.com.au
